

Special Issue

Technologies for Livestock Manure Management

Message from the Guest Editor

AgriEngineering's Special Issue on “Technologies for Livestock Manure Management” welcomes submissions on the advances in technologies, practices, regulations, economics, and environmental aspects of livestock manure management. The scope of technologies includes but is not limited to composting, pelletizing, livestock feed additive, gasification, co-firing, anaerobic digestion, methanol, algae production, aquaculture, bedding or litter, building material, flowerpot, mushroom cultivation, nursery pots, sealing ponds and dams, and soil reclamation. Therefore, we invite authors to submit high-quality research papers, short communications, case studies, analytical and assessment papers on cost and economics, and state-of-the-art critical reviews on “Technologies for Livestock Manure Management”. For further reading, please visit the [Special Issue Website](#).

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Mathew G. Pelletier

Retired Scientist from Agricultural Research Service, United States
Department of Agriculture, Lubbock, TX, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, FSTA, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Agricultural Engineering) / CiteScore - Q1 (Horticulture)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 5.4 days (median values for papers published in this journal in the first half of 2025).
