

Special Issue

AI and Material Science Synergy for Advanced Plant- Wearable Sensors

Message from the Guest Editors

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- AI and ML for plant monitoring, such as algorithms for data analysis, predictive modeling, and decision support.
- Advanced materials for plant-wearable devices, including biodegradable, stretchable, and self-powered sensors.
- Wireless communication and IoT integration, including low-power networking, cloud connectivity, and edge computing.
- Exploring energy harvesting in plant sensors, encompassing nanogenerators, self-sustaining sensors, and eco-friendly power sources.
- Applications in precision agriculture without being limited to disease detection, nutrient monitoring, and stress response analysis.
- Challenges and future directions, tackling scalability, durability, and ethical considerations in smart agriculture.

We look forward to receiving your contributions.

Guest Editors

Dr. Ronnie S. Concepcion II

Dr. Jose Paolo Bantang

Dr. Jane Roche

Prof. Dr. Chih-Yang Lin

Deadline for manuscript submissions

31 December 2025

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Mathew G. Pelletier

Cotton Production and Processing Research Unit, United States

Department of Agriculture, Agricultural Research Services, Lubbock, TX
79403, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubAg, FSTA, AGRIS, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Agricultural Engineering) / CiteScore - Q1
(Horticulture)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.8 days after submission; acceptance to publication is undertaken in 5 days (median values for papers published in this journal in the second half of 2024).
