Message from the Guest Editor

Dear Colleagues,

We are pleased to present this Special Issue, focused on the topic of sustainable agricultural systems for peach orchards. It is intended to present the state of the art and to highlight and suggest new ideas and contributions to this topic of particular significance for both scientists and growers.

Peach is one of the most important fruit tree crops globally within the economically important Rosaceae family. Oftentimes, the cropping practices employed in a region for the production of peaches are principally determined by the different environments, water, and nutritional requirements. In this Special Issue, research articles, reviews, and opinion papers addressing peach research, orchard management, orchard management practices, fruit production, fruit crops, irrigation practices, fertilization practices, root interaction, and the growing environment are all welcome.

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
