Clermont-Ferrand, France

Deadline for manuscript
submissions:

closed (1 June 2020)

Message from the Guest Editor

Biomass production for livestock and human needs has a great influence on nutrient cycles. Relating production and environmental quality requires, thus, a detailed evaluation of emerging production systems and C–N–P cycles in agro-ecosystems. To improve this, we are inviting papers focusing on research on C–N–P cycles and balances in agro-ecosystems in this Special Issue.

Submissions on (but not limited to) the following topics are invited: (i) Plant–soil interactions that mediate CNP cycling (i.e., coupling and decoupling processes), (ii) C–N–P cycling in agro-ecosystems linked to management and climate (e.g., cropping systems, rotation, intensification, grazing vs. mowing), (iii) linking arable cropping and livestock production to improve CNP cycling (e.g., integrated system); (iv) advanced techniques for nutrient supply scheduling; and (v) decision support tools for nutrient diagnostics and modeling.

an Open Access Journal by MDPI

Editor-in-Chief

Wine, University of Adelaide,
Urrbrae, SA 5064, Australia

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
