Message from the Guest Editors

Dear Colleagues,

Despite the ongoing changes in the institutional structure of all regions of the world due to industrialization, the intellectual interest in rural life is perhaps more pronounced than ever.

Our purpose is to consolidate original research and/or review articles on the possibilities and limitations of sustainable development of agriculture, rural areas, food security and self-sufficiency.

To ensure the stability of global agriculture in both economic and social aspects, and to protect markets from unforeseen shocks, as well as to support agricultural diversification, it is necessary to strengthen our knowledge in diverse academic areas, such as agroecology; environmental protection; organic farming; conservation agriculture (agroecological intensification); soil and water management; pest, weed and disease control; social innovation (including value chains).

Our field of interest covers local practices of sustainable development and activities in agriculture, as the solution of food security problems largely depends on provision of quality food, as well as on its physical and economic availability.

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access:—free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: Indexed in the Science Citation Index Expanded (SCIE) - Web of Science from Vol. 5 (2015). Covered in **Scopus** (2019 CiteScore: 1.8) and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2020).
