### Message from the Guest Editors

Dear Colleagues,

The Fourth Industrial Revolution has started to be present in the farming scope by means of Smart Farms that, similar to what is happening with Smart Factories, pursue the interconnection of machines and systems with the premises. We have tools for the management, operation, and planning levels of a farm, as well as for helping technicians in making decisions about problems that may be rapidly changing and not easily specified in advance. These tools are the decision support systems (DSSs). This Special Issue will focus on the new technologies that could be part of DSSs for providing the bases for giving the best answer for crop protection. We welcome novel research, reviews, and opinion pieces covering all related topics, including decisions support systems, farm management information systems, Big Data, Artificial Intelligence, remote sensing, blockchain, management solutions, modeling, case studies from the field, and policy positions.

Deadline for manuscript  
submissions:

**15 December 2020**

## Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

## Author Benefits

**Open Access:**—free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** Indexed in the Science Citation Index Expanded (SCIE) - Web of Science from Vol. 5 (2015). Covered in **Scopus** (2019 CiteScore: 1.8) and other databases.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2020).
