Deadline for manuscript submissions:

31 August 2024

Message from the Guest Editors

Dear Colleagues,

For this Special Issue, we invite studies that take a holistic view on classical as well as biotechnological breeding and consider field performance parameters as well as product quality. We likewise invite fundamental studies investigating the effects of plant characters on a comprehensive scale as well as crop wild relatives that are used to increasing crop gene pools.

A comprehensive approach to crop quality is what unites this Special Issue. With respect to specific study types, this special issue will include essentially any methodology and scale, from macroscopic crop features, classic agronomy and genetics to molecular genetics, biochemistry and omics methods. It will also explore any kind of genetic modification, genome editing, or systematic use of random mutant libraries.

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Agronomy and Crop Science)
