

## **Crop Landraces: Resources, Conservation, and Utilization**

Guest Editors:

**Prof. Dr. Min Huang**

**Prof. Dr. Jun Wu**

**Dr. Jiana Chen**

Deadline for manuscript  
submissions:  
**closed (25 November 2022)**

### **Message from the Guest Editors**

Crop landraces, evolving over time under both farmer and natural-selection pressure, are a major source of adaptive traits that allow subsistence under heat, cold, drought, flooding, salt, or other extreme environmental conditions. Crop landraces provide traits for more efficient nutrient uptake and utilization, and the crop landrace in a specific environment helps create geo-location-specific traits such as quality, taste, and some specific nutrient contents. However, over the last few decades, modern agricultural practices have resulted in a decline in diversity in crop landraces. Various environmental factors such as genetic erosion and local cultivation practices have threatened the landrace diversity. To overcome these threats, continuous efforts are needed to develop efficient and effective conservation policies, strategies, and techniques for crop landraces. Submissions of original research and review articles focused on, but not limited to, the aspects of resources, conservation, and utilization of crop landraces are highly encouraged and appreciated.

## Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
