Horticulture, Iowa State  
University, Ames, IA 50011, USA

**Dr. Bradley J. Heins**

Department of Animal Science,  
University of Minnesota, Morris,  
MN 56267, USA

Deadline for manuscript  
submissions:

**closed (15 July 2020)**

### **Message from the Guest Editors**

The protection or enhancement of carbon and other nutrients in soil organic matter is at the heart of crop–livestock systems, in order to maintain soil fertility and structure in sustainable systems. Organic crop–livestock systems offer particular benefits in terms of reduction of pesticides in the environment and premium prices in the marketplace.

Please share your success stories from research on crop–livestock integration around the world in this Special Issue. Submissions on the following topics (but not limited to) are invited: (1) developing model integrated crop–livestock systems, (2) agronomic practices related to crop–livestock integration, with an emphasis on organic production, (3) methods to reduce production costs for livestock feed and soil fertility amendments, (4) improved soil biological processes to reduce environmental and economic costs, and (5) decision support tools and modeling.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
