

The Application of New GWAS Methods on the Genetic Dissection of Quantitative Traits in Crops

Guest Editors:

Dr. Yuan-Ming Zhang

Dr. Zhenyu Jia

Dr. Shang-Qian Xie

Dr. Jia Wen

Dr. Shi-Bo Wang

Deadline for manuscript
submissions:

closed (30 June 2023)

Message from the Guest Editors

Aim and scope of the Special Issue:

Although multiple environment GWAS experiments (MEGE) are frequently conducted, single environment data analyses are frequently reported. Thus, the MEGE should be jointly analyzed via 3VmrMLM, and its purpose is to test 3VmrMLM, compare it with existing methods, and mine more novel genes for complex traits in crops.

Cutting-edge research:

Detecting elite main-effect genes, gene-by-environment interactions, gene-by-gene interaction for complex traits in crops.

What kind of papers we are soliciting:

Reviews; Perspectives; Research

an Open Access Journal by MDPI

Editor-in-Chief

Wine, University of Adelaide,
Urrbrae, SA 5064, Australia

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Agronomy*) / CiteScore - Q1 (*Agronomy and Crop Science*)
