Message from the Guest Editors

Dear Colleagues,

This Special Issue mainly focuses on research papers related to fungal pathogen identification and phylogeny, molecular genetics of plant fungal pathogens, fungal pathogenic molecular mechanism, and the molecular basis of fungal crop interaction. In the context of this Special Issue, researches on pathogenic fungal related to fruit tree and vegetables are highly important.

In this Special Issue, we aim to exchange knowledge on any aspect related to the progress of pathogenic fungi, thus facilitating sustainable development of crop production in plant cultivation.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
