Dr. Antonio Cellini

Department of Agricultural and Food Sciences, University of Bologna, 40123 Bologna, Italy

Message from the Guest Editors

The present special issue welcomes research papers, communications and review articles providing a mechanistic explanation of the effects of biostimulants or potential biostimulation agents, as well as a systemic perspective in their development or use. The use of multidisciplinary approaches and innovative tools, such as 'omics' technologies and precision agriculture methods, is envisaged to achieve an in-depth characterisation of and a better control over plant responses, microbial functions and agroenvironmental conditions.

Deadline for manuscript submissions:

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
