New Insights into Plant–Microbe Interaction

Message from the Guest Editors

Legumes and vegetables have become important sources of nutrition for humans, but the cultivation and management of these crops can be particularly challenging due to the susceptibility of these species to biotic and abiotic stress. In this Special Issue, we welcome contributions on emerging diseases of legume species and vegetable crops, the development of novel biocontrol agents against pathogens, and the characterization of novel beneficial microorganisms that improve health and resistance to biotic and abiotic stress. We are also interested in studies exploring the molecular basis of plant–microbe interaction including the plant–pathogen, plant–beneficial microorganism, and pathogen–beneficial microorganism interactions. Papers on microbial genomes analyses are also encouraged. We invite experts and researchers to submit their reviews, original research, and opinion pieces addressing topics within the scope of this Special Issue.

Guest Editors

Dr. Eliana Dell'olmo
Dr. Loredana Sigillo
Dr. Giulia Semenzato

Deadline for manuscript submissions

10 October 2026

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
