

Special Issue

Mechanisms of Heavy Metals and Trace Elements Assimilation in Crop and Countermeasures to Attenuate Their Accumulation

Message from the Guest Editors

This special issue aims to provide research advancements of methods and tools to identify, monitor and remove contaminants in soils, especially considering Nature Based Solutions (NBS) as well as sustainable and cost-effectiveness chemical-physical methods. Emphasis will be given to studies that address topics about:

- behavior of Trace Elements in Plant-Soil System, chemical processes involved in the transformation and processes controlling bioavailability and mobility of trace elements in soils;
- uptake, translocation, and transformation of trace elements in crop plant-soil-microbe system,
- bioavailability, phytoavailability, bioaccessibility and risk assessment of essential and non-essential elements in agri-food and soil;
- focus on the balance of trace elements in an agroecosystem;
- biotechnology and nanotechnology to regulate trace elements' behavior in the plant-soil system;
- new technology for characterizing chemical forms and bioavailability of trace elements in agricultural soils;
- soil trace elements as affected by climate change;
- agronomic techniques and anthropogenic activities contribution to soil trace elements contents.

Guest Editors

Dr. Silvia Rita Stazi

Dr. Patrizia Brunetti

Dr. Enrica Allevato

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
