

Special Issue

Cutting-Edge Research on Modern Techniques in Planting and Cultivation

Message from the Guest Editors

With the increasing population and growing food demand, agricultural production faces significant challenges. In order to increase crop yields, improve crop quality, reduce losses from pests and diseases, and achieve sustainable agricultural development, scientists have begun to focus on researching modern crop cultivation techniques. In order to address the challenges of food security and sustainable agricultural development, cutting-edge research in modern crop cultivation techniques of the Special Issue can be summarized as follows: precision agriculture, climate adaptation, genetic resource conservation, nutrition and quality improvement, intelligent agriculture, and other fields promoting the innovation and development of modern crop cultivation techniques. This Special Issue welcomes original research papers, reviews, technical reports, and encourages interdisciplinary and cross-disciplinary research. Additionally, we also accept the introduction and evaluation of research methods, technologies, and instruments related to this field.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
