

Special Issue

Nutrient Cycling and Nitrogen Management in Agroecosystem

Message from the Guest Editors

Synthetic N fertilizer is mainly used to increase crop yields. However, most of the N fertilizer that is applied to agricultural crops is often lost through leaching and gaseous forms. The factors that control these processes are influenced by different agricultural management practices and represent potential controlling factors for the management of nutrient cycles in agroecosystems. However, agroecosystems significantly depend on inputs of N to sustain productivity. Therefore, proper agricultural management practices should be put in place to increase the N availability in agroecosystems. The main aim of this Special Issue is to present original research articles, reviews, mini-reviews, perspective articles, and meta-analysis studies on all aspects of integrated and sustainable agricultural management practices to control the nutrient cycle, particularly the N cycle in agroecosystems.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
