

Special Issue

Role of RNA and ssDNA Viruses in Plant–Virus/Viroid Interactions

Message from the Guest Editors

RNA and single-stranded DNA (ssDNA) play pivotal roles in plant–virus and plant–viroid interactions, significantly influencing plant health and agricultural productivity. Understanding these interactions is essential for developing innovative strategies to manage plant diseases caused by these pathogens. This Special Issue seeks to compile cutting-edge research on the multifaceted roles of RNA and ssDNA in plant–virus/viroid interactions, including the molecular mechanisms of replication, host–pathogen interactions, virus and viroid evolution, and the latest bioinformatics approaches to study these processes. We invite original research articles, comprehensive reviews, case studies, and perspectives that explore various aspects of RNA and ssDNA in plant–viral/viroid interactions. Topics of interest include, but are not limited to, the molecular dynamics of RNA and ssDNA replication, mechanisms of plant defense responses, virus and viroid transmission and evolution, including co-infection of viruses, recombination, and generation of virus and viroid variability, and the impact of these pathogens on plant physiology and crop yield.

Guest Editors

Prof. Dr. Ana Grande-Perez

Dr. Luis Díaz-Martínez

Prof. Dr. Enrique Viguera

Deadline for manuscript submissions

30 September 2025

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
