

# Special Issue

## Phytopathogens and Crop Diseases

### Message from the Guest Editors

The Special Issue “Phytopathogens and Crop Diseases” aims to encapsulate the latest advancements in the field of agricultural science, focusing on the diverse array of pathogens—fungi, oomycetes, bacteria, nematodes, and viruses—threatening crop health and yields. This edition is dedicated to exploring innovative research and methodologies in diagnosing, managing, and controlling crop diseases, offering a broad view of pathogen–host interactions, environmental influences on disease epidemiology, and novel control strategies. We invite original research, reviews, and short communications that deepen our understanding of the dynamics and management of phytopathogens. Topics of interest include, but are not limited to, genomic approaches to plant resistance, the effects of climate change on disease patterns, breakthroughs in disease detection technology, and integrated pest management strategies. This issue aims to foster knowledge exchange among the scientific community to enhance agricultural practices and crop resilience.

### Guest Editors

Dr. Ying-Hong Lin

Department of Plant Medicine, National Pingtung University of Science and Technology, Pingtung 912301, Taiwan

Dr. Yuh Tzean

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
