

## Special Issue

# Adaptation Strategies Under Climate Change in Mediterranean Agriculture

### Message from the Guest Editors

Climate change projections for the Mediterranean region predict a significant decrease in rainfall and an increase in temperatures, which could affect around 48% of cultivated areas; this is a faster rate than the global average. The consequences of these changes for food security and natural resources in this region could be very adverse.

Transformational adaptations in order to face climate change, whether on a farm scale or a larger territorial scale, can be categorized as those requiring more or less time, effort, and system changes. So, the aim and scope of this Special Issue is to invite authors to submit manuscripts on studies or comprehensive reviews on adopting soil, water, and crop-based climate change adaptation practices.

For this Special Issue, manuscripts based on original studies using experimental devices or with the application of informatic tools such as simulation and optimization models or manuscripts with an exhaustive review of the state of knowledge on this topic will be included.

---

### Guest Editors

Dr. António Canatário-Duarte

Polytechnic Institute of Castelo Branco, School of Agriculture, Quinta da Sra. De Mércules, 6001-909 Castelo Branco, Portugal

Dr. José Manuel Monteiro Gonçalves

Department of Agricultural Sciences and Technologies, Polytechnic of Coimbra, College of Agriculture, 3045-601 Coimbra, Portugal

---

### Deadline for manuscript submissions

30 September 2025

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
