Integrated Weed Management in the Agroecosystem

Message from the Guest Editors

Weeds are an important biological constraint to crop production in different agroecosystems. Herbicides are commonly used to manage weeds; however, there are concerns over the use of herbicides alone. There are risks of evolving resistance in weeds with repetitive herbicide use without following proper herbicide rotations and faulty management practices. More importantly, there are limited herbicide options with new modes of action. In addition, there are concerns regarding environmental pollution. To extend herbicide life and to increase herbicide efficacy, there is a need to integrate herbicide use with non-chemical options, including cultural, physical, and biological control methods. This Special Issue will focus on "Integrated Weed Management in the Agroecosystem". We welcome novel research, reviews, short communications, and opinions covering integrated weed management options. Manuscripts must include more than one control measure (e.g., herbicide and mowing, herbicide and crop competition, weed-competitive cultivar and row spacing).

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
