

Special Issue

Soybean Yield and Quality Improvement

Message from the Guest Editor

In order to continuously meet human needs for the quantity and quality of food, crop yield and quality improvement has always been the goal pursued by breeders. After long-term efforts, soybean yield and quality have been greatly improved, playing a significant role in global food security. In order to communicate the achievements in the process of soybean yield and quality improvement, this Special Issue is organized to collect the research carried out in the fields of soybean yield and quality improvement in recent years, focusing on the collection of theories and methods related to soybean yield and quality improvement, and the physiological or molecular mechanisms of yield and quality formation.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief
