

Special Issue

Improving Agricultural Water Productivity to Ensure Food Security under Changing Environments

Message from the Guest Editors

The main goal of this Special Issue is to publish high-quality research articles addressing recent developments in feasible, integrative and synergistic practices and approaches at diverse scales such as crop, farm, and irrigation scheme, which will contribute to improving water productivity. Topics such as deficit irrigation, water harvesting, soil–water conservation practices, improved irrigation systems, diversified cropping systems, alternative water resources, irrigation water delivery, and others will be considered for inclusion in this Special Issue. **Keywords**

- crop physical and economic water productivity indicators
- improved irrigation systems
- water-saving practices and technologies
- irrigation water delivery
- sustainable crop and water management
- irrigation scheduling
- climate variability and climate change
- droughts
- decision-support systems
- water management tools
- food security
- remote sensing
- precision irrigation
- adaptation practices to cope with soil salinity

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
