

Special Issue

Advances in Soil Remediation Techniques for Degraded Land

Message from the Guest Editors

The growth of the world's population requires better use of resources in all production sectors and, in agricultural activities, the possibility of using by-products would be one of the best strategies to produce food, generate income, and reduce the consumption of non-infinite environmental resources. Therefore, the aim of this Special Issue is to collect original research or systematic reviews that address the possibilities of using by-products or sustainable technologies and strategies to improve the performance of agricultural and forestry activities, especially in degraded land and low-fertility agro-systems.

Guest Editors

Dr. Antonio Ganga

Dr. Thiago Assis Rodrigues Nogueira

Dr. Arun Dilipkumar Jani

Dr. Gian Franco Capra

Deadline for manuscript submissions

31 December 2025

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
