

## Special Issue

# Sustainability of Rice Cultivation System: Management Practices and Market Opportunities—Volume II

### Message from the Guest Editor

Dear Colleague, Rice (*Oryza sativa* L.) is one of the most important crops grown worldwide and is the staple food of over half of the world's population. High rice production can be sustained in two ways: by expansion of cultivation area and increase in land productivity. Achieving high rice production requires an increase in water resources, fertilizer input, pesticide applications, and so on. However, those crop intensification processes have led to environmental pollution, soil fertility degradation, and crop yield reduction. Thus, it is imperative that efforts be made to increase rice-based cropping system productivity and alleviate the deleterious crop intensification processes by improving management practices. This Special Issue of *Agronomy* aims to publish the latest research progress on management practices to enhance the sustainability of rice cultivation systems. For this Special Issue, we welcome investigators to contribute original research articles and review papers.

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
