

Special Issue

Invasive Lepidoptera: Monitoring, Distribution, Taxonomy, Evolution, and Management of Agricultural and Forest Pests

Message from the Guest Editors

Background & history of this topic: With the recent increase in international trade, concerns about invasive pests are increasing. In addition, as the distributional ranges of insect pests expands or moves according to environmental changes such as climate change, unexpected insect species are becoming pests. Lepidoptera insects are a huge group of insects with over 200,000 known species worldwide, including many pest species due to their diverse ecological characteristics. Against this background, the need for research on invasive pest species is increasing. Aim and scope of the Special Issue: The aim of the special volume is to provide useful and practical information of the invasive species of Lepidoptera pests by synthesizing the research results on the investigation, classification, evolution and management among agricultural and forest pests. Cutting-edge research: molecular systematics; taxonomy; identification; evolution; management What kind of papers we are soliciting: research articles only

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
