

Special Issue

Adaptation and Mitigation of Environmental Stress on Forage Crops and Turfgrass

Message from the Guest Editors

Turfgrass management has evolved from providing an aesthetic quality to producing turfgrass systems that are capable of superior characteristics with less input and reduced environmental impacts; forage crops are the major feeding source for providing high nutrition for herbivores. This Special Issue focuses on the progress of environmentally sound turfgrass management with emphasis on efficient turfgrass management systems to address the abiotic and biotic challenges managers are confronted with and advances in sustainable turfgrass and forage crop breeding. This Special Issue solicits cutting-edge and applied turfgrass and forage research that addresses the efforts being made to reduce adverse impacts from abiotic and biotic stresses to preserve turfgrass systems through improvements in management and selective breeding.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
