

## Special Issue

# Biostimulants in Plant Growth Promotion and Stress Protection in Crops

### Message from the Guest Editor

The use of plant biostimulants has become common practice in agriculture and provides a huge number of benefits in terms of stimulating growth and protecting against stress. The biostimulator is used to increase nutrient absorption, stimulate growth, increase stress tolerance, or improve crop quality. The use of biostimulants, i.e., substances that promote plant growth and resistance, seems to be the most effective way of achieving satisfactory effects. Biostimulants are part of the modern plant industry and environmentally friendly crop management as they improve the quality of crops while reducing chemical inputs. This Special Issue aims to demonstrate the unique properties of various biostimulants, which have a profound effect on the properties of crops and fiber plants. In this Special Issue, research articles, reviews, and opinion-forming articles on biostimulants, plant growth, protection against stress, and biostimulants promoting plant growth are welcome. All kinds of manuscripts are welcome, including original research papers, research concepts, news, and reviews.

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
