

Special Issue

Circular Agriculture: Waste-to-Resource Innovations in Cropping Systems

Message from the Guest Editors

This Special Issue invites interdisciplinary research on waste valorization, from biochar production to microbial upcycling and closed-loop nutrient cycling. Submissions may explore topics including (but not limited to) the agroecological integration of waste streams, digital tools for optimizing resource loops, drivers of circular adoption, and policy frameworks enabling transitions toward responsible production. Field experiments, life cycle assessments, and multi-stakeholder case studies are encouraged. We welcome original research, reviews, and perspectives that bridge scales from molecular innovations to systemic design. Contributions addressing technical barriers, scalability challenges, or synergies between circular practices and **global sustainability goals**—such as *Zero Hunger* (reducing food loss and enhancing soil health), *Responsible Consumption and Production* (minimizing waste and closing resource loops), and *Climate Action* (mitigating emissions through carbon-smart practices)—will advance actionable solutions for agriculture's future.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
