

## Special Issue

# Artificial Intelligence as a Support for Forecasting in Sustainable Agriculture

### Message from the Guest Editors

We invite you to contribute to the Special Issue **“Artificial Intelligence as a Support for Forecasting in Sustainable Agriculture”**. As global populations grow and climate challenges intensify, modern solutions like artificial intelligence (AI) and machine learning are essential for improving agricultural forecasting. These tools help farmers make better decisions on crops, resource management, and adapting to environmental changes. AI-enabled forecasting can predict crop yields, quality traits (e.g., nutrient content, disease susceptibility), and optimize pest and disease management. It also supports sustainable practices by analyzing soil conditions (pH, moisture, nutrients) and forecasting resource needs (water, fertilizers, pesticides). We welcome researchers, practitioners, and industry professionals to share their insights and innovations. Join us in shaping the future of sustainable agriculture. We look forward to receiving your applications.

---

### Guest Editors

Prof. Dr. Gniewko Niedbała

Department of Biosystems Engineering, Faculty of Environmental and Mechanical Engineering, Poznań University of Life Sciences, Wojska Polskiego 50, 60-627 Poznań, Poland

Dr. Magdalena Piekutowska

Department of Geocology and Geoinformation, Institute of Biology and Earth Sciences, Pomeranian University in Słupsk, 27 Partyzantów St., 76-200 Słupsk, Poland

---

### Deadline for manuscript submissions

closed (31 March 2026)

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
