Special Issue

Risk Assessment of Heavy Metal Pollution in Farmland Soil

Message from the Guest Editors

Strengthening farmland protection is a crucial guarantee for food security, sustainable agricultural development, and the quality and safety of agricultural products. The spatial distribution of heavy metals in cultivated land varies greatly. Meanwhile, with the diversified development of the social economy, there is a lack of refined prevention and control technologies and supervision methods for heavy metal pollution in farmland in different regions. This Special Issue, in response to the important mission of farmland protection, solicits the latest research manuscripts related to the entire chain of farmland protection, Source tracing, soil environment monitoring, restoration. restoration effect assessment, and supervision technology methods. What kind of papers are we solicitina:

- Monitoring and risk assessment of the farmland soil environment:
- Source tracing, remediation technology, and a model of heavy metal pollution in farmland;
- Evaluation of the effect of farmland restoration;
- Intelligent and information-based supervision of farmland land protection and restoration;
- Policies for the protection and restoration management of farmland land.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
