

Special Issue

Agricultural Innovation and Sustainable Development in Tropical Cropping Systems

Message from the Guest Editors

Historically, agricultural production systems in tropical ecosystems have played a rather predatory role in land use and crop management. Deforestation practices, conventional agriculture, and intensive pasture led to losses of soil, water, and nutrients, implying a need for a shift towards conservationist systems. However, in the last 50 years, there has been a revolution in production systems. The objective of this Special Issue is to focus on scientific productions (manuscripts) that address the theme: *Agricultural Innovation and Sustainable Development in Tropical Cropping Systems*. These changes have occurred in the various stages of the production process, including soil use and management, genetic improvement of plantain cultivars, and pest and disease control, resulting in the advancement of production and productivity. We are therefore accepting Scientific Research and Review Manuscripts that address the theme of Agricultural Innovation and Sustainable Development in Tropical Cropping Systems.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
