

## Special Issue

# Plant Nutrition Eco-Physiology and Nutrient Management

### Message from the Guest Editors

In plant nutrition yields, theoretical research on the physiological ecology and applied research on fertilization management represent two critical aspects that contribute to fully understanding soil fertility, plant growth, physiological and biochemical processes, yield performance, and quality formation in response to different nutrient scenarios under greenhouse and field conditions. The goal of this research topic is to gather the latest advances on the mechanisms underlying plant nutrition physiology and their ecological repercussions. The scope concentrates on a comprehensive analysis of the nutritional functions and the regulation of mineral elements and their interactions in plant–soil systems, with a focus on highly efficient nutrient utilization and the potential applications of nutrient management in the development of sustainable agricultural practices. We warmly welcome all article types, including research papers, reviews, and short communications, to be published in this topic as part of *Agronomy*.

### Guest Editors

Dr. Jiuxin Guo

College of Resources and Environment, Fujian Agriculture and Forestry University, Fuzhou 350002, China

Dr. Tianyuan Yang

School of Tea Science, Anhui Agricultural University, Hefei, China

### Deadline for manuscript submissions

30 November 2025

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
