Special Issue

Turfgrass Maintenance and Breeding to Reduce Environmental Impacts

Message from the Guest Editor

During the latter half of the 20th century, turfgrass management evolved from the use of turf valued for its aesthetic quality to that of turfgrass systems capable of superior characteristics with fewer inputs and reduced environmental impacts. In the new millennium, turfgrass managers face new challenges, including a focus on reducing carbon footprints and increasing resource conservation and efficiency. This Special Issue aims to explore the progress in environmentally sound turfgrass management with a focus on efficient turfgrass management systems and advances in sustainable turfgrass breeding. To this end, we are soliciting basic and applied cutting-edge turfgrass research papers on efforts to reduce the adverse impacts of turfgrass management through improvements in the management and selective breeding of sustainable turfgrasses.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. *Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston
Gulbali Centre for Agriculture, Water and Environment Research, Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
