

## Special Issue

# Crop Canker and Blight Diseases Caused by Fungal Pathogens and Their Biological Control

### Message from the Guest Editors

Crop canker and blight diseases caused by fungal pathogens are responsible for huge economic losses in agriculture and forest all over the world in all climatic zones. In recent decades, we have observed tremendous progress in phytopathological and molecular research as well as in developing new biocontrol solutions used to fight these diseases. In this Special Issue, we welcome original and review papers from all research areas dedicated to fungus-induced plant diseases such as canker and blight that can be found in all species of crop plants, especially including research on resistant and/or susceptible cultivars. Manuscripts on the biocontrol of fungal pathogens of crop species are of special importance, mostly due to the negative impact of climate changes caused by extreme temperatures and drought and/or flood.

### Guest Editors

Prof. Dr. Andrzej Kiejstut Kononowicz

Department of Plant Ecophysiology, Faculty of Biology and Environmental Protection, University of Lodz, 90-237 Lodz, Poland

Dr. Violetta Katarzyna Macioszek

Department of Biology and Plant Ecology, Faculty of Biology, University of Bialystok, 15-245 Bialystok, Poland

### Deadline for manuscript submissions

closed (31 August 2023)

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
