

Special Issue

Detection and Control of Diseases and Pests in Fruits

Message from the Guest Editors

Fruit tree diseases and pests have a great influence on agricultural production worldwide and a global economic impact through the loss of productivity and trade limitations. This Special Issue will focus on the “Detection and Control of Diseases and Pests in Fruits”. We are open to novel research, reviews and opinion articles covering all aspects of the detection and diagnostics, surveillance and/or forecasting of transboundary, emerging, re-emerging and invasive pests and diseases associated with fruit trees, a rapid response to, and recovery from pests and diseases that pose threats to fruit production and the food supply system, as well as those that suggest management practices and innovative strategies that can control or minimize the impacts of pre-harvest and post-harvest invasive, emerging and re-emerging diseases and pests in fruits.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
