

Special Issue

Utilization and Management of Grassland Ecosystems

Message from the Guest Editors

Grassland is an important terrestrial ecosystem on the surface of the earth. It is not only a huge green ecological barrier and terrestrial carbon pool, but also a grassland animal husbandry development base and food security guarantee. However, in recent years, with global climate warming and the intensification of human activities, grassland ecosystems are suffering from varying degrees of damage, making more than 90 % of China's grassland degradation. Rational utilization and efficient management of grassland are one of the important measures to mitigate climate change and increase carbon sequestration and emission reduction activities. This Special Issue calls for original and novel papers on the utilization and management of grassland ecosystems and their current and future challenges by combining remote sensing, field experiments, multidisciplinary tools, and ecological models, to better understand the grassland ecosystem and the restoration of these degraded grasslands and practicing the concept of green development.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
