

Special Issue

Plant Production and Microorganism Potential in Modern Agro-Ecosystems—3rd Edition

Message from the Guest Editors

Sustainable development strategies and programs implemented around the world include restrictions not only on the use of plant protection products and mineral fertilizers but also on stimulating the development of organic farming, changing the eating habits of society, protecting and restoring ecosystems, and increasing the biodiversity of natural resources. To meet future food needs, research is required to maximize crop productivity without negatively impacting the environment.

For this Special Issue, we encourage you to submit your research and reports on the following topics:

Modern aspects of the cultivation, fertilization, and protection of crops;

Soil health and quality;

Farming simplifications as a response to the challenges of sustainable agriculture;

New sources of nutrients for plants;

Biological methods aiming to improve the sustainability of agroecosystems;

Current threats and prospects for the protection of agroecosystems.

Guest Editors

Prof. Dr. Agnieszka Wolna-Maruwka

Prof. Dr. Tomasz Kleiber

Prof. Dr. Agnieszka Pilarska

Deadline for manuscript submissions

31 October 2026

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
