

Special Issue

Plant Virus and Its Epidemiology, Evolution, and Interaction with the Host

Message from the Guest Editors

Plant viruses have been integral in agriculture, with some being developed into tools for different applications. While many topics are critical in plant virology, this Special Issue will explore three important subjects: epidemiology, evolution, and plant virus-host interactions. Studies of epidemiology and evolution provide a detailed outlook of the current situations of diseases caused by plant viruses and also contribute to the overall understanding of the history and origins of viruses. Most of this research relies on the knowledge of virus-host interactions. Therefore, we encourage our fellow scientists to submit valued research and contribute to this Special Issue in the *Agronomy* journal. We seek any fundamental or translational research studies in the field of epidemiology, evolution, and virus-host interactions involved in plants, insects, or other associated organisms.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
