

Special Issue

Green Control of Pests and Pathogens in Tropical Plants

Message from the Guest Editors

Plants, pests and pathogens do not experience the overwintering period in the tropics, and the management strategies are relatively complex and intractable. The goal of this Special Issue is to provide an overview of recent advances in the green control of pests and pathogens in tropical plants.

Potential topics include (but are not limited to):

- Monitoring and early warning of pests and pathogens that indicating green control operation;
- Biological control using natural enemies, microorganisms, biopesticides or natural products;
- The rational way of applying traditional pesticide without toxicity effect to the ecological environment;
- The application of novel agriculture practice;
- The application of resistant plant varieties;
- The application of plant immunomodulatory agents;
- The application of genetic engineering technology in pest and pathogen prevention and control;
- Future perspectives for the green control of pests and pathogens in tropical plants.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
