

## Special Issue

# Dissecting Genetic Basis of Crop Agronomic Traits through Bioinformatics

### Message from the Guest Editor

Understanding the genetic and genomic basis of agronomic traits is important for gene discovery and the improvement of breeding germplasms, but much remains a mystery in spite of significant population genetics. With the rapid development of phenomics, genomics, etc., integrating information will be a big challenge, providing new perspectives for understanding complex traits in crops and accelerating molecular breeding. The goal of this Special Issue is to collect the latest advances in understanding the genetic basis in crops derived from the development or application of bioinformatics. We particularly encourage research focused on, but not limited to, gene diversity, gene–environment interplay, and integrated information using multiple methods, multiple populations, or multi-omics.

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

---

### Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,  
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
