

Special Issue

Innovative Applications of Waste-Derived Materials for Soil Health, Sustainable Agriculture and Environmental Engineering

Message from the Guest Editor

Proper waste management plays a crucial role in sustainable agriculture, environmental protection, and the transition toward a circular economy, as it helps to maximize the recovery and reuse of materials. Transforming waste into resources also plays a significant role in increasing economic resilience in the face of global challenges such as climate change and resource scarcity. This Special Issue will focus on interdisciplinary, cutting-edge research and developments regarding the use of waste-derived materials to improve soil health, promote sustainable agriculture, and advance environmental engineering practices. Authors are encouraged to submit articles or review papers on this topic.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
