

## Special Issue

# Advanced Technology of Agricultural Ecological Environment Restoration

### Message from the Guest Editors

The agro-ecological environment is deteriorating as a result of irrational human exploitation and use. Efforts to improve the health of the agro-ecological environment, reduce/repair agricultural pollution and ensure food security are urgently needed. With the diversification of environmental pollution, a series of research gaps have not been filled. Therefore, we urgently need to combine the latest environmental ecological restoration problems with advanced environmental improvement technologies to develop new technologies to protect the environment. This Special Issue focuses on the latest environmental problems and the current situation of sustainable agricultural development, and explores the latest research progress and cutting-edge innovative technologies relevant to the agricultural ecological environment, from the micro to macro level. We welcome the submission of new research articles, reviews, and case reports to this Special Issue. Manuscripts dealing with new approaches to the application of novel remediation technologies, remediation mechanisms and influencing factors, risk assessment, and management are also welcome.

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
