Special Issue

Water Use Efficiency for Resilient Economies: Innovative Experimental Approaches Based on the Soil Conditioners—Series II

Message from the Guest Editors

The main objective of this Special Issue is to gather high-quality papers related to innovative water management strategies and the rational use of soil conditioners, aimed to maximize water use efficiency and yields, improve the soil properties, and mitigate global warming. Specific applications in urban areas, i.e., parks, tree-lined avenues, urban gardens, green roofs, will be welcome.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research, Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
