

Special Issue

Automation for Digital Farming

Message from the Guest Editor

Digital farming is a new agricultural paradigm that makes agriculture easier, through the use of smart sensors, drones, robots, and cloud computing, and maximizes agricultural production through optimal decision-making using big data regarding crop production and the input of fertilizer and pesticide. This Special Issue will focus on “Automation for Digital Farming”, a new stage of automation technology for agricultural production, harvesting, and distribution. We welcome research and reviews covering all related topics, including agricultural automation technology such as sensing, control, informatization, and solutions for improving agricultural production efficiency and convenience.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
