

## Special Issue

# Highlighting and Enhancing Ecosystem Services of Crops and Weeds in Agroecosystems

### Message from the Guest Editors

Providing food for different organisms, hosts for pollinators and natural enemies, soil stability, nutrient cycling, soil fertility, carbon sequestration, improved water infiltration, runoff reduction and erosion prevention are some of the various ecosystem services potentially provided by crops and weeds. However, the impact of several underestimated crops (such as legumes, industrial and new crops) and natural vegetation on human well-being and climate change mitigation is usually overlooked. The aim of this Special Issue includes the identification, quantification, prioritization, and enhancement of ecosystem services and the study of their interactions and effects on the sustainability of agroecosystems. The Special Issue welcomes research and reviews on multiple aspects of ecosystem services, as well as their evaluation and further promotion. Please share your studies on any of the several topics related to various ecosystem and agroecosystem services and the effects of agronomic practices.

### Guest Editors

Dr. Ioannis Gazoulis

Laboratory of Agronomy, Agricultural University of Athens, 11855 Athens, Greece

Dr. Ilias Travlos

Faculty of Crop Science, Agricultural University of Athens, 118 55 Athens, Greece

### Deadline for manuscript submissions

20 March 2026

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
