Special Issue

Vegetable Adaptation and Mitigation of Abiotic Stress

Message from the Guest Editors

This Special Issue aims to gather the latest research results on vegetable adaptation and abiotic stress mitigation, especially focusing on how to use this knowledge to optimize the adaptability of vegetables to various abiotic stress factors (such as extreme temperature changes, water restriction, drought, salt, heavy metal stress, etc.). We hope that, by sharing cutting-edge scientific discoveries and cases of technological applications, we can promote exchanges and cooperation between academia and industry, jointly explore more efficient and sustainable solutions to the current challenges, and, finally, achieve the goal of both ensuring food safety and protecting natural resources.

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet. Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research, Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
