

Special Issue

Genomic-Oriented Precision Breeding and Smart Farming in Model Plants and Cash Crops

Message from the Guest Editors

This Special Issue of *Agronomy* entitled “Genomic-Oriented Precision Breeding and Smart Farming in Model Plants and Cash Crops” calls for interesting and exciting findings in some highlighted aspects.

- Causal and major function genes in keystone agronomic traits;
- Large-scale investigation of germplasm resources;
- In-depth characterization of genetic and epigenetic crosstalks;
- Gene editing of loss- or gain-of-function and moderate modifications;
- Computational solutions of phenotyping and farm management.

This Special Issue is not limited to the fields mentioned above. All relevant studies with good quality are welcome. Keywords: crop breeding; crop functional genomics; crop development; crop epigenetics; gene editing; biosynthesis; phenomics; machine learning

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
