

## Special Issue

# State-of-the-Art Research on Weed Populations and Community Dynamics

### Message from the Guest Editors

In order to contribute effectively to the sustainability of agriculture, there must be a change in mindset regarding weed management since in most situations the actual focus is still limited to knowledge on the control of a given weed species affecting a given crop or only during the agronomic cycle. However, no single control method translates into a fully effective solution to a weed problem. Therefore, weed management should be approached as an integrated science adopting a combination of a simultaneous set of varied strategies. To achieve such a goal, the understanding of both weed populations and community dynamics is of uppermost importance to the management and prediction of their spatial and temporal evolution under increasingly complex scenarios, such as climate change and/or herbicide resistance evolution. In this Special Issue, we welcome novel and original studies, reviews, and opinion pieces covering all topics related to weed population and community dynamics, such as demography studies, population-/community-level dynamic models, spatially explicit models, the evolution of herbicide resistance, adaptation to weed management methods, new and emerging weeds, etc.

### Guest Editors

Dr. Guillermo R. Chantre

Departamento de Agronomía, Universidad Nacional del Sur y CERZOS (CONICET), Bahía Blanca 8000, Argentina

Dr. Marcos Yannicari

Facultad de Agronomía, National University of La Pampa/YPF Tecnología (YPF-CONICET), Santa Rosa 6300, Argentina

### Deadline for manuscript submissions

31 October 2026

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
