

## Special Issue

# Effect of Soil Enzyme Activity on Crop Growth

### Message from the Guest Editor

Soil enzymes play critical roles in organic matter decomposition, nutrient cycling, and microbial metabolism, reflecting the functional status of soil ecosystems. Enzyme activity is a valuable bioindicator of soil quality and historical environmental disturbances. This Special Issue of *Agronomy* highlights the ecological significance, diagnostic utility, and methodological advancements in soil enzymatic activities. The scope of this issue encompasses enzyme responses to various factors, including agricultural practices, pollution, land degradation, and climate change. We will showcase recent advancements in molecular techniques, high-throughput enzyme assays, and holistic soil health frameworks. We invite submissions of original research articles, comprehensive reviews, and short communications that explore the roles of soil enzymes in sustainable agriculture, soil restoration, nutrient cycling, and climate-smart practices. We would particularly welcome contributions that use interdisciplinary approaches or innovative methods to assess and interpret soil enzymatic activity in different ecosystems.

## About the Journal

### Message from the Editor-in-Chief

*Agronomy* draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

*Agronomy* is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
