

Special Issue

Genetic Analysis in Crops

Message from the Guest Editors

This Special Issue calls for contributions on Genetic Analysis in Crops. We welcome original research, reviews, mini-reviews, and methods related to, but not limited to, the following areas: gene identification and analysis during crop development; gene regulation and molecular mechanism in response to abiotic stress or biotic stress; genetics, genomics and evolutionary study of crop genes; novel approaches to investigate crop genes. Keywords

- crop genes
- genetics and genomics
- crop gene identification and analysis
- crop development
- crop adapt to the climate changes
- crop evolutionary study
- crops in response to abiotic stress and biotic stress
- gene editing, AI techniques and other novel methods in crop research

About the Journal

Message from the Editor-in-Chief

Agronomy draws together researchers from diverse areas of agricultural research with a common aim of enhancing agricultural productivity globally. The journal provides unlimited free access to all those interested in advancing agricultural science from both the research and general community. Papers are released immediately after acceptance through the internet.

Agronomy is supported by our authors and their institutes through low article processing charges (APC) for accepted papers. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Leslie A. Weston

Gulbali Centre for Agriculture, Water and Environment Research,
Charles Sturt University, Wagga Wagga, NSW 2678, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Agronomy and Crop Science)
